

ABSTRACT OF THE DISCLOSURE

Treatment and prophylaxis of endotoxin caused toxicity is disclosed. This is accomplished by administering phospholipid containing compositions to the subject. The compositions are protein and peptide free, and may contain triglycerides, or other polar or neutral lipids.

---

-- ABSTRACT OF THE DISCLOSURE

u Protein and peptide free compositions are described, which are useful in treating endotoxemia. The compositions contain a phospholipid and a neutral lipid, preferably phosphatidylcholine and triglyceride. --.
